## About Mini Music-Makers

Children are taught by specialist music teachers to make music through singing and playing instruments. Melody and percussion instruments are integrated with favourite songs and well-known nursery rhymes.

The Early Music programme will gradually introduce stringed instruments, in particular the violin, and this instrument will become the focus of musical learning for each child.

There are established pathways within the Music Service for children to grow and develop as musicians throughout all of their school years, and our Mini Music-Makers programme is the basis of this journey.
